

## Examination and Treatment of the Foot and Ankle Evening Workshops

*New 2009 dates TBA*

Whittington Hospital, Archway, London Chris Murphy

These evening lectures, a condensed version of the 1 ½ day course, firstly aim to refresh relevant clinical anatomy of the foot and ankle region. This is then integrated to outline a comprehensive assessment procedure complementing and furthering existing practice. The key conditions affecting the foot and ankle are then discussed using case examples brought along by participants. The clinical reasoning process is then highlighted and appropriate management strategies are discussed and practised.
