

Clinical Skills Development through DVD

Series 2: Sports Taping

Incredible value series of Interactive DVD's and "active learning" solutions for physiotherapists, physical therapists, sports therapists and athletic trainers. Comprising 2 DVD's in 2 modules this series includes about 5 hours of broadcast quality interactive footage developed in association with Physios in Sport (ACPSM).

Series 2 is a comprehensive overview of Sports Taping with over 50 techniques described. It contains two modules one focussed on the lower body and the other on the upper body and trunk. Each module features a discussion of the rationale and aims of each technique, precautions, detailed demonstrations and functional tests.
